ABOUT

Recent Computer Science graduate seeking entry-level software development, full-stack web development, developer tools, data-oriented systems, and technical support roles. Experienced with React/Vite, Flask, MySQL, Socket.IO, Docker, Unity/C#, C/UNIX programming, testing, and debugging through academic projects, solo projects, and two senior design capstones.

EDUCATION

B.S. Computer Science, Marquette University, Milwaukee, WI

May 2026

SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, C, C#, HTML/CSS, R

Technologies: React, Vite, Flask, Socket.IO, REST APIs, Unity

Tools & Testing: MySQL, DBeaver, Docker, Docker Compose, Git/GitHub, Linux/WSL, Figma, Vite testing, manual testing, debugging

PROJECTS

Personal Portfolio Platform - React/Vite Web & Terminal Experience | Personal Project

markyoingco.com

MAY 2026 - PRESENT

Responsive portfolio platform with cinematic webpage and command-line terminal experiences for showcasing software projects, resume materials, testimonials, travel photography, and contact workflows; MarkAI portfolio assistant currently in development

- Built and deployed a responsive React/Vite application with dark/light themes, shared project, testimonial, and travel data, resume PDF access, and a PHP/MySQL contact backend hosted on DreamHost
- Developed an interactive terminal portfolio with folder navigation, readable project files, context-aware Help panels, Tab autocomplete, command history, editable input, and terminal-based contact submissions connected to the same API

Abacus - Programming Competition Platform | COSC 4998 Senior Design Project

Marquette University

JAN 2026 - MAY 2026

Full-stack web platform used to run the Wisconsin-Dairyland Programming Competition, supporting student submissions, teacher workflows, admin tools, leaderboards, help requests, and automated grading

- Implemented Eagle Division workflows, student/teacher pages, submission features, help request support, and admin-facing tools for managing users, teams, schools, problems, submissions, and results
- Connected frontend workflows with Python backend APIs, MySQL storage, and Judge0 grading, helping support the first fully successful live competition run in recent years for 200-300+ users without major crashes, critical bugs, or major lag

TA-Bot / MAAT - Automated Homework Evaluation Platform | COSC 4920 Principles of Design

Marquette University

AUG 2025 - JAN 2026

Academic grading platform used by Marquette Computer Science professors and teaching assistants to run, test, evaluate, and return feedback on student programming assignments

- Built rubric grading features including rubric editing, save functionality, observed error tables, error-point calculations, score recalculation, line-referenced feedback, and grading-page cleanup
- Developed plagiarism-detection functionality and validated grading workflows through backend API integration, database checks, Docker Compose testing, debugging, and UI cleanup

Finch Web Controller - Finch Web Robotics Control | COSC 3810 Software Design and Analysis

Marquette University

JAN 2026 - MAY 2026

Web-based robotics platform that allowed users to control BirdBrain Finch 2.0 robots through browser pages, room codes, multiplayer lobbies, and real-time controller screens

- Led frontend development by building web controller pages, designing Figma mockups, creating UI layouts, writing setup documentation, and supporting class onboarding through PowerPoint walkthroughs and live demonstrations
- Structured Socket.IO communication between frontend controls and Flask-SocketIO robot handlers while helping teach Finch robot setup, Python scripting, Flask-SocketIO concepts, and frontend/backend communication

WORK EXPERIENCE

Audio-Visual Technician

Marquette University

FEB 2025 - MAY 2026

- Supported live campus events by setting up, operating, and troubleshooting laptops, projectors, microphones, speakers, lighting, wiring, remotes, presentation equipment, and sound systems for conferences, concerts, and productions

Information Desk Specialist Manager

Marquette University

JAN 2024 - MAY 2026

- Managed front-desk and building operations by creating staff schedules, reviewing shifts and timesheets, running staff meetings, monitoring security cameras, coordinating room schedules, handling access, incident, visitor, student, and staff communication

ADDITIONAL INFORMATION

Leadership & Involvement: Sigma Chi - Risk Manager & Merchandise Chair, Association for Computing Machinery, Bayanihan Student Organization, Marquette Powerlifting Club, Kapwa Bible Study
