ABOUT

Recent Computer Science graduate seeking entry-level software development, full-stack applications, developer tools, data-oriented systems, and technical support roles. Built and deployed a multi-mode React/Vite portfolio with Webpage, Terminal, and MarkAI experiences and contributed to senior design, robotics, systems programming, Unity, and data projects.

EDUCATION

B.S. Computer Science, Marquette University, Milwaukee, WI

May 2026

SKILLS

Languages: JavaScript/TypeScript, Python, PHP, SQL, C, C#, HTML/CSS, R

Frameworks & Technologies: React, Vite, Flask, Flask-SocketIO, Socket.IO, REST APIs, MySQL, Cloudflare Workers AI, Unity

Tools & Testing: Git/GitHub, Docker Compose, Linux/WSL, DBeaver, Figma, API and regression testing, build validation, debugging

PROJECTS

Personal Portfolio Platform - Webpage, Terminal & MarkAI | Personal Project

markyoingco.com

MAY 2026 - PRESENT

Multi-mode React/Vite portfolio with Webpage, Terminal, and MarkAI experiences for showcasing projects, resume materials, testimonials, travel photography, and contact workflows

- Built and deployed a responsive Webpage with dark/light themes, mobile layouts, shared content, resume access, and DreamHost-hosted PHP/MySQL contact workflows
- Developed Terminal navigation, Help, autocomplete, history, and API messaging; built MarkAI with Cloudflare Workers AI, intent routing, response validation, fallbacks, privacy controls, usage limits, and regression testing

Abacus - Programming Competition Platform | COSC 4998 Senior Design Project

Marquette University

JAN 2026 - MAY 2026

Full-stack platform for the Wisconsin-Dairyland Programming Competition, supporting submissions, messaging, help requests, role-based workflows, and automated grading

- Implemented Eagle Division workflows across React and Flask, including student/admin pages, team messaging, role-aware navigation, instructions, submissions, help requests, and team selection
- Integrated REST APIs, MySQL, Docker, and Judge0; helped deliver the first fully successful live competition run in recent years for 200-300+ users without major crashes, critical bugs, or lag

TA-Bot / MAAT - Automated Homework Evaluation Platform | COSC 4920 Principles of Design

Marquette University

AUG 2025 - JAN 2026

Academic grading platform used by Marquette professors and teaching assistants to evaluate programming assignments and return structured feedback

- Built grading features including save/load, observed-error tables, line feedback, error-point and score recalculation, error removal, save-status feedback, and interface cleanup
- Developed plagiarism-detection functionality with token and AST similarity, thresholds, sorting, pagination, warnings, and comparison links; validated it with APIs, MySQL, Docker Compose, debugging, and UI testing

Finch Web Controller - Browser-Based Robotics Control | COSC 3810 Software Design and Analysis

Marquette University

JAN 2026 - MAY 2026

Browser-based robotics platform for controlling BirdBrain Finch 2.0 robots through controller pages, room codes, multiplayer lobbies, and real-time command workflows

- Led frontend development by building controller pages, creating UI layouts and Figma mockups, producing visual assets, writing setup documentation and installation walkthroughs, preparing PowerPoint materials, and supporting class onboarding through demonstrations
- Structured Socket.IO communication between frontend controls and Flask-SocketIO robot handlers while helping teach Finch robot setup, Python scripting, Flask-SocketIO concepts, and frontend/backend communication

WORK EXPERIENCE

Audio-Visual Technician

Marquette University

FEB 2025 - MAY 2026

- Supported live campus events by setting up, operating, and troubleshooting laptops, projectors, microphones, speakers, lighting, wiring, remotes, presentation equipment, and sound systems for conferences, concerts, and productions

Information Desk Specialist Manager

Marquette University

JAN 2024 - MAY 2026

- Managed front-desk and building operations by creating staff schedules, reviewing shifts and timesheets, running staff meetings, monitoring security cameras, coordinating room schedules, handling access, incident, visitor, student, and staff communication
